**BEST PRACTICES** are defined as:
“A procedure that has been shown by research and experience to produce optimal results and that is established or proposed as a standard suitable for widespread adoption.” - Merriam Webster

The USDA created a diverse seven-member panel with expertise in nutrition education to create the CACFP Best Practices. These practices serve as a guide for child care providers who choose to take additional steps to offer high-quality and nutritious meals in their program. Strategies are supported by evidence and have been shown to be effective.

They were created to promote consistency in programs and increase confidence that education efforts will result in positive nutrition and health-related behavior changes.

**ADDITIONAL BEST PRACTICES**
- Incorporate seasonal and locally produced foods into meals.
- Limit serving purchased pre-fried foods to no more than one serving per week.
- Avoid serving non-creditable foods that are sources of added sugars, such as sweet toppings (e.g., honey, jam, syrup), mix-in ingredients sold with yogurt (e.g., honey, candy, or cookie pieces), and sugar sweetened beverages (e.g., fruit drinks or sodas).
- Adult day care centers should offer and make water available to adults upon their request, throughout the day.

**CACFP Best Practices**

**INFANTS** Support mothers who choose to breastfeed their infants by encouraging mothers to supply breastmilk for their infants while in day care and offer a quiet, private area that is comfortable and sanitary for mothers who come to the center or day care home to breastfeed.

**FRUIT**
- Make at least 1 of the 2 required components of a snack a fruit (or a vegetable).
- Serve a variety of fruits and choose whole fruits (fresh, canned, dried, or frozen) more often than juice.

**VEGETABLE**
- Provide at least one serving each of dark green vegetables, red and orange vegetables, beans and peas (legumes), starchy vegetables, and other vegetables once per week.

**MILK**
- Serve only unflavored milk to all participants. If flavored milk is served to children 6 years old and older, or adults, use the Nutrition Facts Label to select and serve flavored milk that contains no more than 22 grams of sugar per 8 fluid ounces, or the flavored milk with the lowest amount of sugar if flavored milk within this sugar limit is not available.
- Serve water as a beverage when serving yogurt in place of milk for adults.

**MEAT/MEAT ALTERNATES**
- Serve only lean meats, nuts, and legumes.
- Limit serving processed meats to no more than one serving per week.
- Serve only natural cheeses and choose low-fat or reduced fat-cheeses.

**GRAINS** Provide at least two servings of whole grain-rich grains per day.
